

CLAIMS:

5 What is claimed is:

1. An assemblage comprising:

an electrical connector having body with a tubular projection having a push-through
portion having a first diameter and an engaging portion having a second diameter larger than
10 said first diameter;

and a support having a major part that is substantially rigid and includes an aperture
formed by a plurality of deflectable spokes, said aperture having a center opening with a third
diameter greater than said first diameter and less than said second diameter, whereby said
tubular projection push-through portion slides through said aperture and said spokes engage
15 said second diameter of said engaging portion and mount said electrical connector with said
support.

2. The assemblage of Claim 1 wherein a stop associated with said second diameter
limits the amount of movement possible for said support.

20

3. The assemblage of Claim 2 wherein said spokes of said support diverge away from
the plane of said major part of said support.
